Problem Solving | Adaptability | Leadership

Remote Collaboration

🔧 INTERESTS

Travelling | Reading | Cricket | Cycling

💼 PROFESSIONAL EXPERIENCE

SDE Intern, Salesken.ai ↗
03-2023 – 07-2023 | Bengaluru, Karnataka
- Developed APIs using Java, Spring Boot, and Servlets to ensure smooth functionality
- Wrote SQL queries for PostgreSQL database, optimizing data management
- Migrated Elasticsearch to PostgreSQL, improving performance
- Conducted thorough debugging of code to identify and resolve issues for enhanced performance
- Independently integrated Zoho Billing, streamlining financial management and playing a key role in achieving project goals

📁 PROJECTS

Online Exam Management System ↗
Deployed Link: ↗
The Exam Portal is a user-friendly web app for managing exams. It ensures high performance, scalability, and security.
User Features:
- Users select quizzes and attempt them within set time limits, viewing details and questions
- Upon completion, participants can save and view their results

Admin Features:
- Effortlessly manage categories, quizzes, and questions
- Create, update, get, delete categories, quizzes, questions and profiles
- Activate, disable quizzes as needed

Tech Stack: SpringBoot | Java | Hibernate | MySQL | Angular | TypeScript | HTML | CSS | Material-UI
Independently developed the project, ensuring security and validation measures at every stage over a span of 15 days.

Online Trip Management System ↗
Demonstration Video: ↗
Created a RESTful API service for an Online Trip Management System, allowing users to perform essential CRUD operations while ensuring validation at every step.
User Features:
- Implemented user registration, login, and authentication with access restrictions for logged-in users
- Enabled availability checks for packages, hotels, and buses, and developed bus search, view, and booking features

Admin Features:
- Admins have full authority and control over the entire project, with the ability to manage and modify Package, Hotel, Route, Bus, and Customer records in the main database

Areas of Responsibility:
- Created the customer module flow
- Integrated validation through the app
- Created Travel and Bus module flow

Tech Stack: SpringBoot | Java | Hibernate | MySQL
Led a team of 5 and excuted under 5 days, composed of backend developers.
